PrimeTouch App's

Applications for network operations

Technical Note IXD-644-TN Issue 1

Three leak location applications are now available to operate on the *PrimeTouch* processor platform. The new *Mikron3* and *Enigma* applications have been added to the existing *Eureka3* application.

PrimeTouch Features

- High definition touch screen for easy operation
- Interactive displays via 'screen swipe' feature
- Leak detection operations on one processor
- Large virtual buttons for when gloves are worn

Eureka3

- 16-bit digital correlation
- Interactive pipe, correlation and coherence displays
- Unwanted noise suppression

Mikron3

- High quality acoustic performance
- Wireless sensors for reduced wind noise
- Minimum noise level and frequency display

Enigma – program/readback

- Easy field programming
- Data collection

Correlation post-processing using powerful Enigma PC software

- Advanced filtering and coherence functions
- Auto velocity determination
- Pipe schematics

technology for network management and leakage control
